| Anurag R. Saxena | LL.M. Sem 4 | Hypothesis and its elements were very well taught by different topic examples. Dependent, independent variables and how they could change the result affecting our hypothesis was the most important part. |
| Dhanashree Mukesh Hublikar | Syllm sem 4 | Hypothesis is a tentative question to which the researcher seeks to find answers, it serves as the guiding path for the researcher by framing a tentative problem and provides proper direction for finding the possible resolutions to the same. |
| Jigar Mahendra Dedhia | LLM SEM2 | Formulating research hypotheses is like making educated guesses about what you're going to find in your study. These guesses help you stay on track and measure things clearly. When your findings match your guesses, it builds trust in your research. Clear and testable guesses also make it easier for others to repeat your work, which boosts your research's credibility. So, in a nutshell, hypotheses are like roadmaps for reliable and trustworthy research. |
| Zainab Qureshi | FY LLM SEM 2 | It provides direction to the research by setting a goal to achieve, proving or disproving the hypothesis. It also provides a framework for reporting conclusions of the study. |
